As a Data Scientist at Axionable, I focus on Geospatial and Climate Change projects and support clients in achieving Trustworthy AI Certification to comply with the EU AI Act. I hold a double degree in engineering from INSA and an M.Sc. from ETS Montreal. I am actively mentoring an intern for his master thesis in engineering. I also serve as the referent for the Generative AI mission at Axionable, contributing to strategic initiatives and knowledge sharing around this emerging AI technologies.

SKILLS

Tools and Languages	Python, Git, Bash, Java, C
Main Library	Xarray, (Geo)Pandas, Scikit-Learn, Folium, Shap
ML Techniques	Unsupervised, supervised and reinforcement learning
Other Tech Tools	Cloud Technology on AWS and GCP, Docker, Computer Network Security, Web Scraping
Other Skills	Trustworthy Methodology and Regulation expert and audit

CURRENT EXPERIENCE - MID-LEVEL AI/ML ENGINEER @ AXIONABLE - 7+ CONSULTING MISSIONS

Exposure Measurement of impact of drought and flood hazards 2023-2024
Geospatial Data Scientist Insurance Paris, France

- Key responsibilities: Scientific research, Implementation of algorithms for predicting CatNat (Natural Catastrophe) attribution and quantifying the damage caused by climate change
- Key skills / Tools: Climate modeling, Climate data pipeline, Climate file format (Netcdf, Xarray, GeoPandas), Climate data source (Copernicus, Drias, Hydroportail), Distributed computing in the cloud (Spark on GCP)

Climate Risk Calculation 2024
Data Scientist Geospatial - Asset Manager / Finance France / South-Africa

- Key responsibilities: Calculation of vulnerability scores for financial assets according to different scenarios and climate horizons
- Key skills / Tools : Climate modeling, Climate file format (Netcdf, GRIB), Climate data source (Copernicus, Drias)

Implementation of Trustworthy AI Methodology and Support for LNE certification 2024
Trustworthy AI Technical Consultant - Finance / Industry / Retail France

- Key responsibilities: Analysis of the methodology and documentation of the projects audited in accordance with Trustworthy AI reference frameworks and the state of the art
- Key skills / Tools: AI Regulations (AI Act), Analysis, Project Management, Azure, AWS, Confluence

OTHER EXPERIENCE

Junior Data Scientist - 5+ consulting missions 2023
Axionable Paris, France

- Technical consultant for trustworthy AI certification (LNE, LabelIA)
- Delivery for climate projects : building drought *Vertex AI on GCP with Drias Data*
- Key skills / Tools: AI Regulations (AI Act), Trustworthy AI Framework and programming, Project Management

Data Engineer Internship 2022
Thales Toulouse, France

- Design of Search Engine Database : OpenSearch / ELK Stack and an Object Storage Database : minIO (AWS S3 API)
- Automation of Web scraping (Scrapy, Selenium, Splash) to help analyze real time key asset
- Delivered a project with high cybersecurity constraints
- Deployment on private cloud with container (Docker and Kubernetes)

EDUCATION

M. Sc. in Information Technology, ETS Montreal 2021 — 2022
McGill - Advanced Math and Finance, Montreal 2022
Engineer Diploma in Information Systems Architecture , INSA Rouen 2017 — 2021
Specialized in Data Science

PROJECT AND ACTIVITIES

Smart IOT Weather Station on Cloud (AWS) 2023
Bike Sharing Visualization and Prediction 2022
Personal chatbot trained on my WhatsApp with Bert (Gen AI / LLM / NLP) 2021
Scientific Partners - Association for Promoting Science and Technology to Kids 2020
Learning Moocs or reading books about Tech 2020-Present
