

Lead AI Engineer at Theodo. I build the harnesses that make AI agents deliver reliably (orchestration, tools, context, evals, guardrails) and the infrastructure that serves LLMs at scale in production. Before that, 10+ consulting missions at Axionable across GenAI, climate risk, geospatial data science and Trustworthy AI (EU AI Act).

SKILLS

LLM Inference & Serving	vLLM, GPU serving, performance & security benchmarking, observability
Agentic Engineering	AI coding agents, workflow harnesses, context engineering, RAG, evals, guardrails
Platform & Ops	Kubernetes, ArgoCD, GitOps, Docker, AWS, GCP (Vertex AI), Azure
Data & ML	Python, Scikit-Learn, (Geo)Pandas, Xarray, Spark, SHAP
Trustworthy AI	EU AI Act, LNE certification, audit of AI methodology & documentation

CURRENT EXPERIENCE - LEAD AI ENGINEER @ THEODO

Technical Lead – Agentic SDLC <i>Carrefour (via Theodo)</i>	Sep 2026 — Present <i>Paris, France</i>
- Own the technical direction and architecture of Carrefour’s agentic software development lifecycle. - Engineer the harness (orchestration, tooling, context, evaluation, guardrails) so AI coding agents deliver reliably. - Bring AI coding agents into the teams’ day-to-day delivery workflow.	
Inference Engineer <i>BNP Paribas (via Theodo)</i>	Sep 2025 — Sep 2026 <i>Paris, France</i>
- Worked on one of the largest LLM serving platforms in Europe, serving LLMs to thousands of users. - vLLM model serving and performance tuning; security and performance benchmarking of models. - Production incident investigation; GitOps deployments with ArgoCD on Kubernetes.	

PREVIOUS EXPERIENCE - AI/ML ENGINEER @ AXIONABLE - 10+ CONSULTING MISSIONS

GenAI: RAG for ESG Performance <i>AI Project Lead – Finance / ESG</i>	2025 <i>France</i>
Led the design and deployment of a multimodal RAG system (text, PDF, slides) for ESG benchmarking, with a focus on evaluation methodology (LLMs, Vertex AI, vector databases).	
Climate Risk & Geospatial Data Science <i>Geospatial Data Scientist – Insurance / Finance</i>	2023 – 2025 <i>Paris, France</i>
- Delivered 6+ climate-risk projects (drought, flood, multi-hazard) for insurers and asset managers: CatNat attribution and asset vulnerability scoring. - Built a scalable geospatial platform adopted by 40+ industrial sites, and climate data pipelines on Spark / GCP (NetCDF, GRIB; Copernicus, Drias).	
Trustworthy AI Methodology & LNE Certification <i>Trustworthy AI Technical Consultant – Finance / Industry / Retail</i>	2023 – 2025 <i>France</i>
- Audited AI project methodology and documentation against Trustworthy AI frameworks and the EU AI Act (LNE, LabelIA). - GenAI referent at Axionable; mentored a master’s-thesis intern.	

OTHER EXPERIENCE

Data Engineer Intern, Thales, Toulouse – OpenSearch / ELK, MinIO, Docker / Kubernetes, high cybersecurity constraints	2022
--	------

EDUCATION

M. Sc. in Information Technology, ETS Montreal – double degree with INSA Rouen	2021 — 2022
<i>McGill - Advanced Math and Finance, Montreal</i>	2022
Engineer Diploma in Information Systems Architecture, INSA Rouen – specialized in Data Science	2017 — 2021

PROJECTS AND ACTIVITIES

Pollen Allergy Forecast – forecast web app on GitHub Pages	2026
Talk with me – personal LLM chatbot on my portfolio	2026
Smart IoT Weather Station on Cloud (AWS)	2023
Personal chatbot trained on my WhatsApp with BERT (Gen AI / LLM / NLP)	2021
